

Santiago Gómez

Senior Backend Developer · Python

santiago.gomez@email.com · +54 9 11 4823-7610 · Buenos Aires, Argentina · [linkedin.com/in/santiagomez](#)

PROFILE SUMMARY

Backend engineer with 8 years of experience designing and scaling distributed systems in high-traffic production environments. Deep expertise in Python, FastAPI, and Django. Led cross-functional teams of up to 6 engineers and drove migrations from monolith to microservices. Passionate about clean architecture, observability, and developer experience.

WORK EXPERIENCE

Senior Backend Engineer

[Mercado Digital S.A.](#)

Mar 2021 – Present · Buenos Aires (hybrid)

- Architected a real-time pricing microservice handling 12 000 req/s using FastAPI + Redis Streams.
- Led migration of the monolithic checkout service to 4 independent microservices, reducing p99 latency by 34%.
- Implemented blue-green deployments on EKS; zero-downtime releases across 3 production clusters.
- Mentored 3 mid-level engineers through weekly code reviews and bi-weekly 1:1s.

Backend Developer

[Softwave Latinoamérica](#)

Jan 2019 – Feb 2021 · Córdoba, Argentina

- Built REST APIs with Django REST Framework for a fintech SaaS serving 40 000 SME clients.
- Designed PostgreSQL schemas and query optimizations that cut report generation time by 60%.
- Integrated AWS SQS/SNS for async notification pipelines; processed ~2 M events/day.

Python Developer

[CodeFactory MX](#)

Jun 2016 – Dec 2018 · Remote (CDMX)

- Developed Django web applications for e-commerce clients in the retail sector.
- Containerised legacy applications using Docker, enabling consistent dev/prod parity.

EDUCATION

B.Sc. Computer Science

[Universidad de Buenos Aires \(UBA\)](#)

2012 – 2016

Graduated with honors. Thesis on distributed consensus algorithms.

TECHNICAL SKILLS

Languages	Python (expert), SQL, Bash, Go (intermediate)
Frameworks	FastAPI, Django, Django REST Framework, Celery
Databases	PostgreSQL, Redis, MongoDB, DynamoDB
Cloud & Infra	AWS (EC2, RDS, S3, SQS, EKS), Docker, Kubernetes, Terraform
Observability	Prometheus, Grafana, OpenTelemetry, Datadog
Practices	TDD, DDD, Clean Architecture, CI/CD, Agile/Scrum

LANGUAGES

Spanish	Native
---------	--------

English

Professional proficiency (C1)

Portuguese

Basic (A2)

PROJECTS

OpenQueue — Open-source task queue library

Designed and published a lightweight async task queue for Python 3.11+, built on asyncio and PostgreSQL LISTEN/NOTIFY. 340 GitHub stars.

PricingEngine prototype — internal R&D;

Proof-of-concept ML-augmented dynamic pricing engine using FastAPI + scikit-learn, presented at an internal engineering summit.
