

Valentina Ríos

Semi-Senior Backend Developer · Python

valentina.rios@email.com · +57 310 452-8811 · Medellín, Colombia · github.com/vale-rios

PROFILE SUMMARY

Backend developer with 4 years of experience building REST APIs and internal tools with Python and Flask. Comfortable owning features end-to-end: from database design to deployment. Currently expanding cloud skills toward AWS Solutions Architect certification.

WORK EXPERIENCE

Backend Developer

[Nexo Tecnología](#)

Aug 2022 – Present · Medellín, Colombia (hybrid)

- Built and maintained Flask APIs for a SaaS HR platform used by 200+ companies.
- Designed MySQL schemas for payroll and attendance modules, improving query performance by 40%.
- Set up CI/CD pipelines with GitHub Actions, reducing deployment friction for a team of 5.
- Introduced unit and integration testing (pytest), raising code coverage from 18% to 71%.

Junior Python Developer

[DataBridge Solutions](#)

Mar 2020 – Jul 2022 · Bogotá, Colombia

- Developed ETL pipelines to ingest and normalize data from 12 third-party APIs.
- Maintained internal Flask dashboards for operations teams.
- Deployed applications on AWS EC2 using basic Nginx + Gunicorn setups.

EDUCATION

B.Sc. Systems Engineering

[Universidad EAFIT](#)

2016 – 2020
