

Rodrigo Fernández

Senior DevOps / Platform Engineer

rodrigo.fernandez@email.com · +54 9 11 7723-0081 · Buenos Aires, Argentina · github.com/rodferops

PROFILE SUMMARY

Platform engineer with 9 years of experience building and operating large-scale cloud infrastructure on AWS. Deep expertise in Kubernetes, Terraform, and GitOps workflows. Reduced infrastructure costs by 40% at current employer through rightsizing and spot instance strategies. Committed to reliability, security, and developer self-service.

WORK EXPERIENCE

Senior DevOps / Platform Engineer

[OLX Argentina](#)

Apr 2020 – Present · Buenos Aires (remote-first)

- Own multi-account AWS organisation (14 accounts, \$2.1M annual spend); reduced cost by 40% YoY.
- Manage 3 production EKS clusters (300+ pods) with Argo CD GitOps deployments.
- Authored 60+ Terraform modules; migrated all infrastructure from ClickOps to IaC in 8 months.
- Built internal developer platform (Backstage + custom plugins) adopted by 80+ engineers.
- Set up centralised observability stack: Prometheus, Grafana, Loki, Tempo.

DevOps Engineer

[Wolox](#) — now [Accenture](#)

Jan 2017 – Mar 2020 · Buenos Aires, Argentina

- Delivered CI/CD pipelines (Jenkins, later GitHub Actions) for 20+ client projects.
- Deployed containerised applications on AWS ECS and EKS; introduced Helm chart standards.
- Implemented HashiCorp Vault for secrets management across 8 microservice architectures.

Linux Systems Administrator

[Globalink ISP](#)

Feb 2015 – Dec 2016 · Buenos Aires, Argentina

- Administered 200+ Linux servers (CentOS/Ubuntu); automated patching with Ansible.
- Set up network monitoring with Nagios; reduced mean time to detect incidents by 35%.

EDUCATION

B.Sc. Network Engineering

[Universidad Tecnológica Nacional \(UTN\)](#)

2010 – 2015

AWS Solutions Architect Professional

[Amazon Web Services](#)

2019 (renewed 2022)

Certified Kubernetes Administrator (CKA)

[CNCF / Linux Foundation](#)

2021

TECHNICAL SKILLS

Cloud	AWS (EKS, EC2, RDS, S3, IAM, VPC, Cost Explorer — expert)
Containers & Orchestration	Kubernetes, Helm, Argo CD, Argo Workflows, Docker
IaC	Terraform, Terragrunt, Ansible, Pulumi (basic)
CI/CD	GitHub Actions, Jenkins, GitLab CI, Argo CD

Observability	Prometheus, Grafana, Loki, Tempo, Datadog, PagerDuty
Security	Vault, SOPS, OPA/Kyverno, AWS IAM, network policies
Languages	Bash, Python, Go (basic)

LANGUAGES

Spanish	Native
English	Fluent (C1)

PROJECTS

TerraStack — internal IaC toolkit

Collection of opinionated Terraform modules for AWS (VPC, EKS, RDS, S3, IAM) with automated security scanning via Checkov. Open-sourced on GitHub.
